

IMPROVE YOUR PRODUCT QUALITY USING AI

VisionTracker

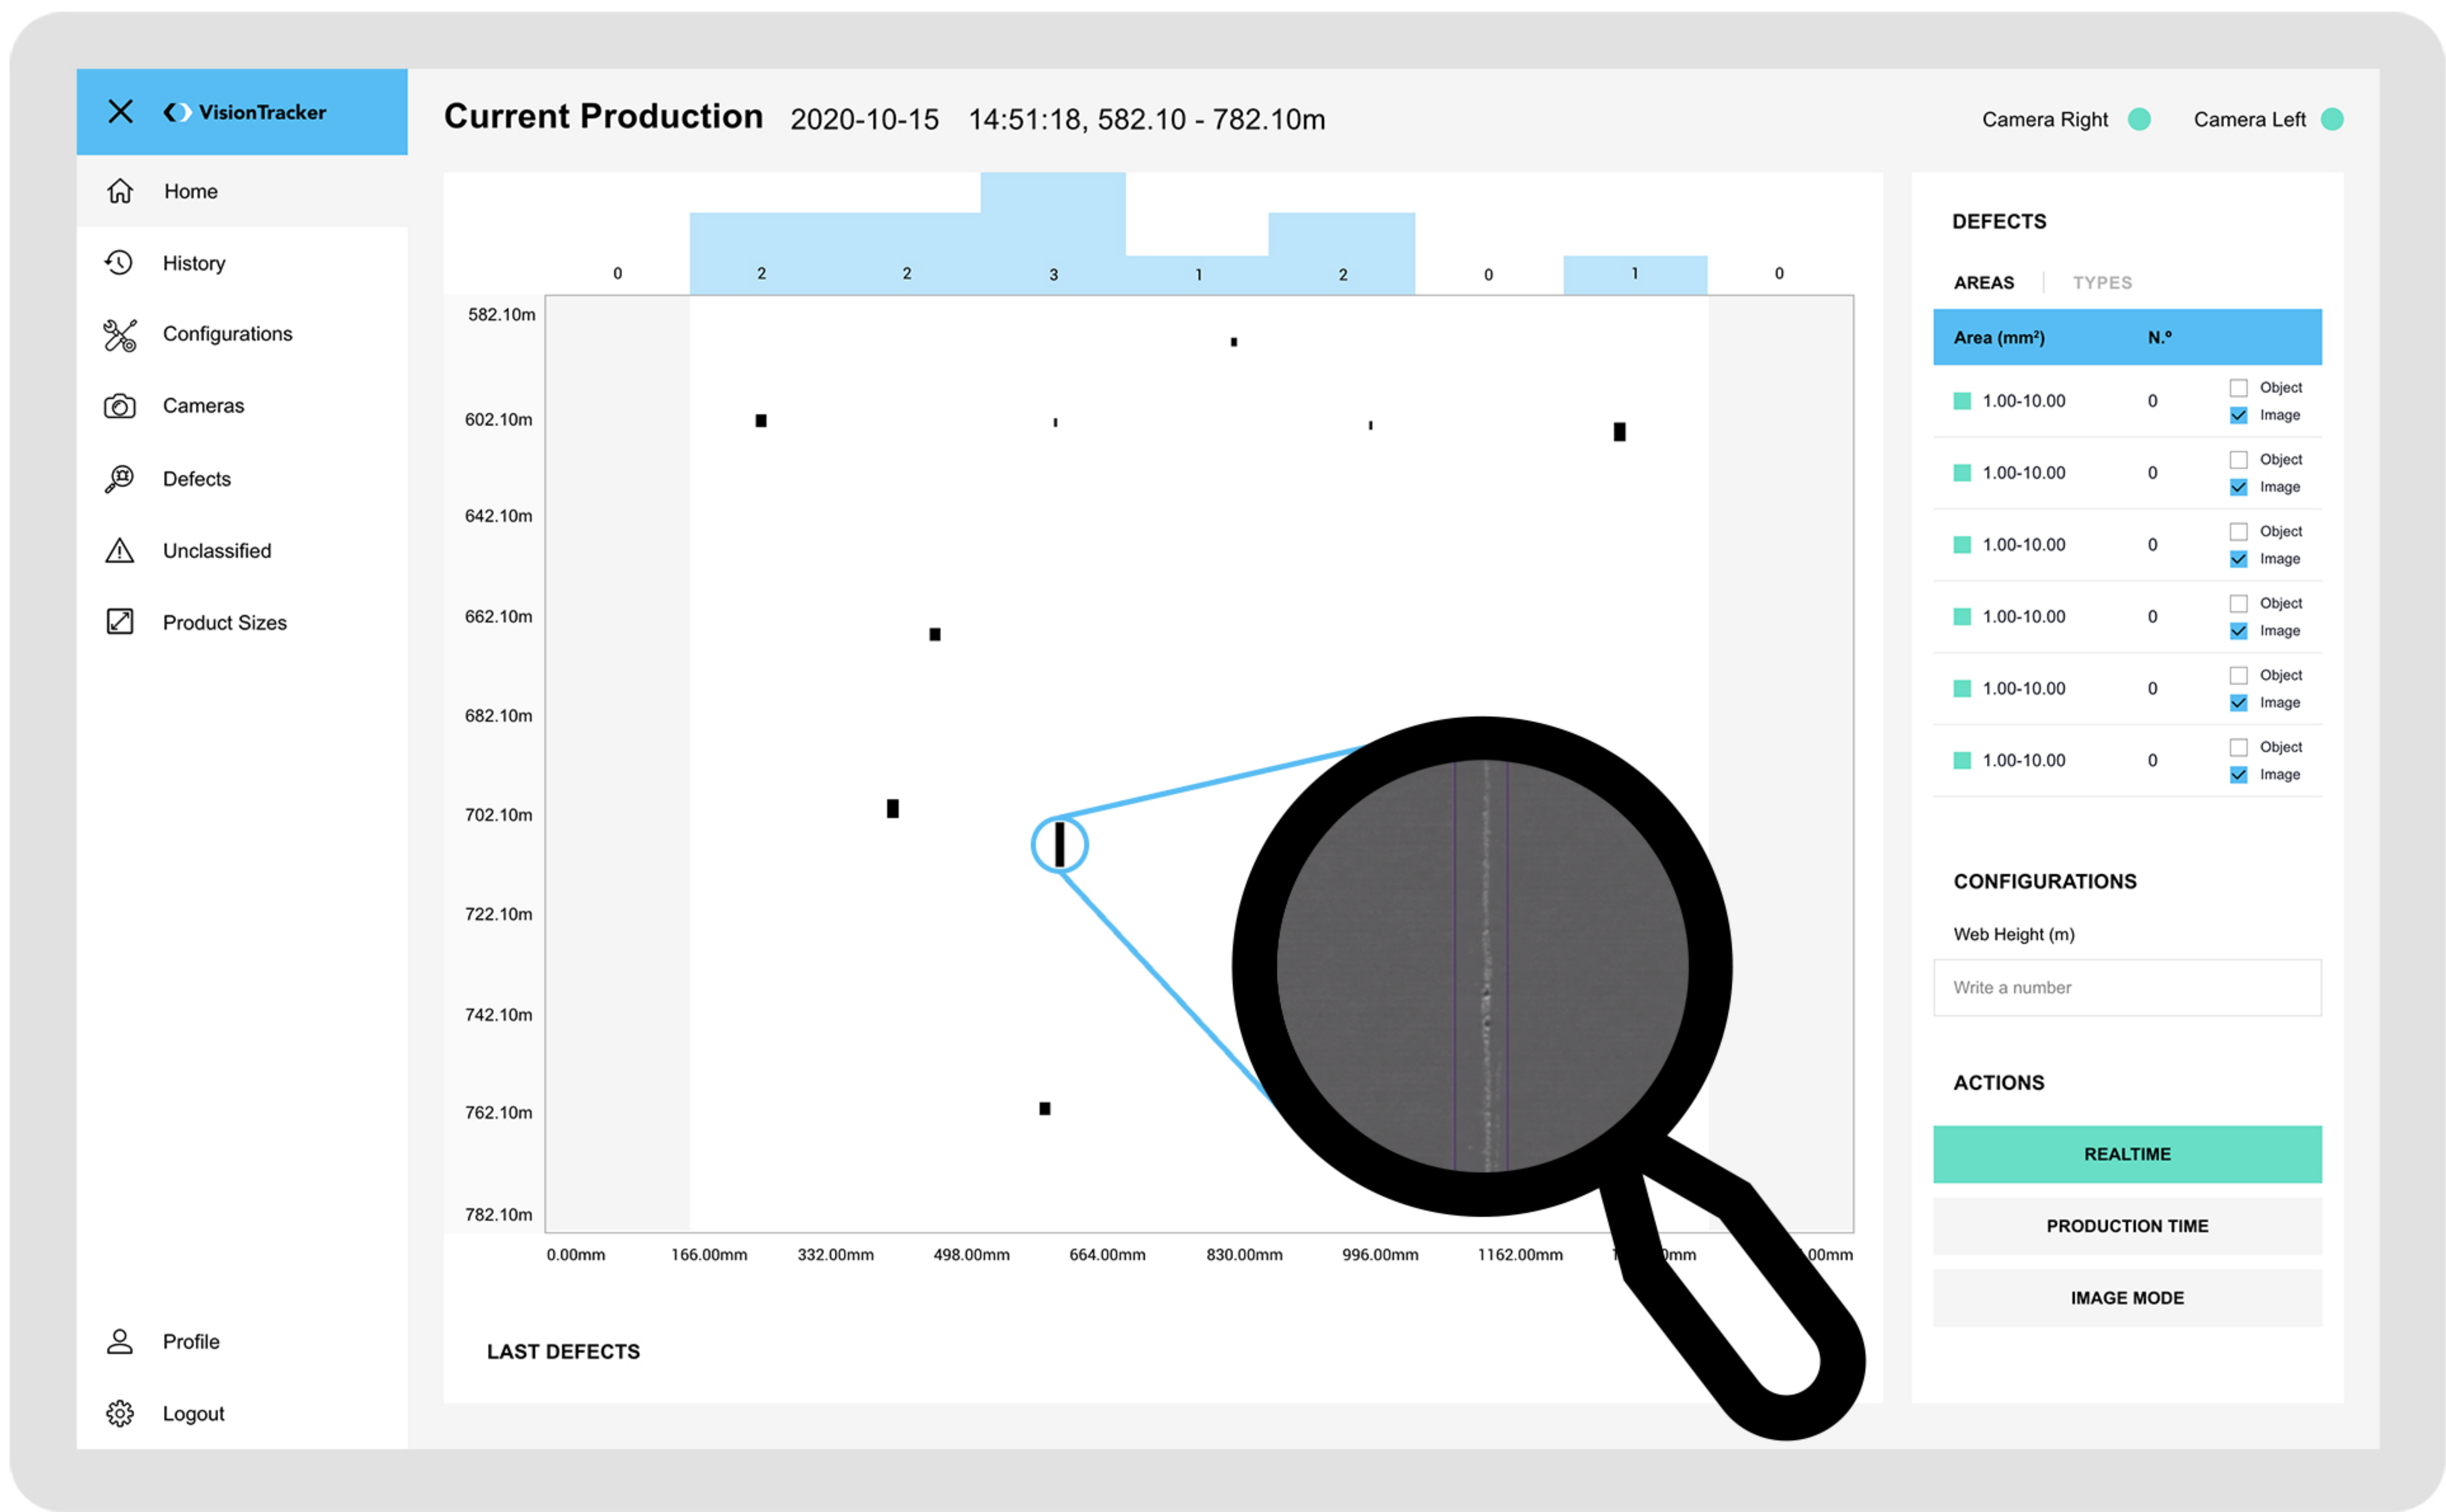

Developed by  lumilio

Integrated Quality Control Solutions For Adhesive Band Application.

Real-time Information

The solution allows real time quality product visualization.

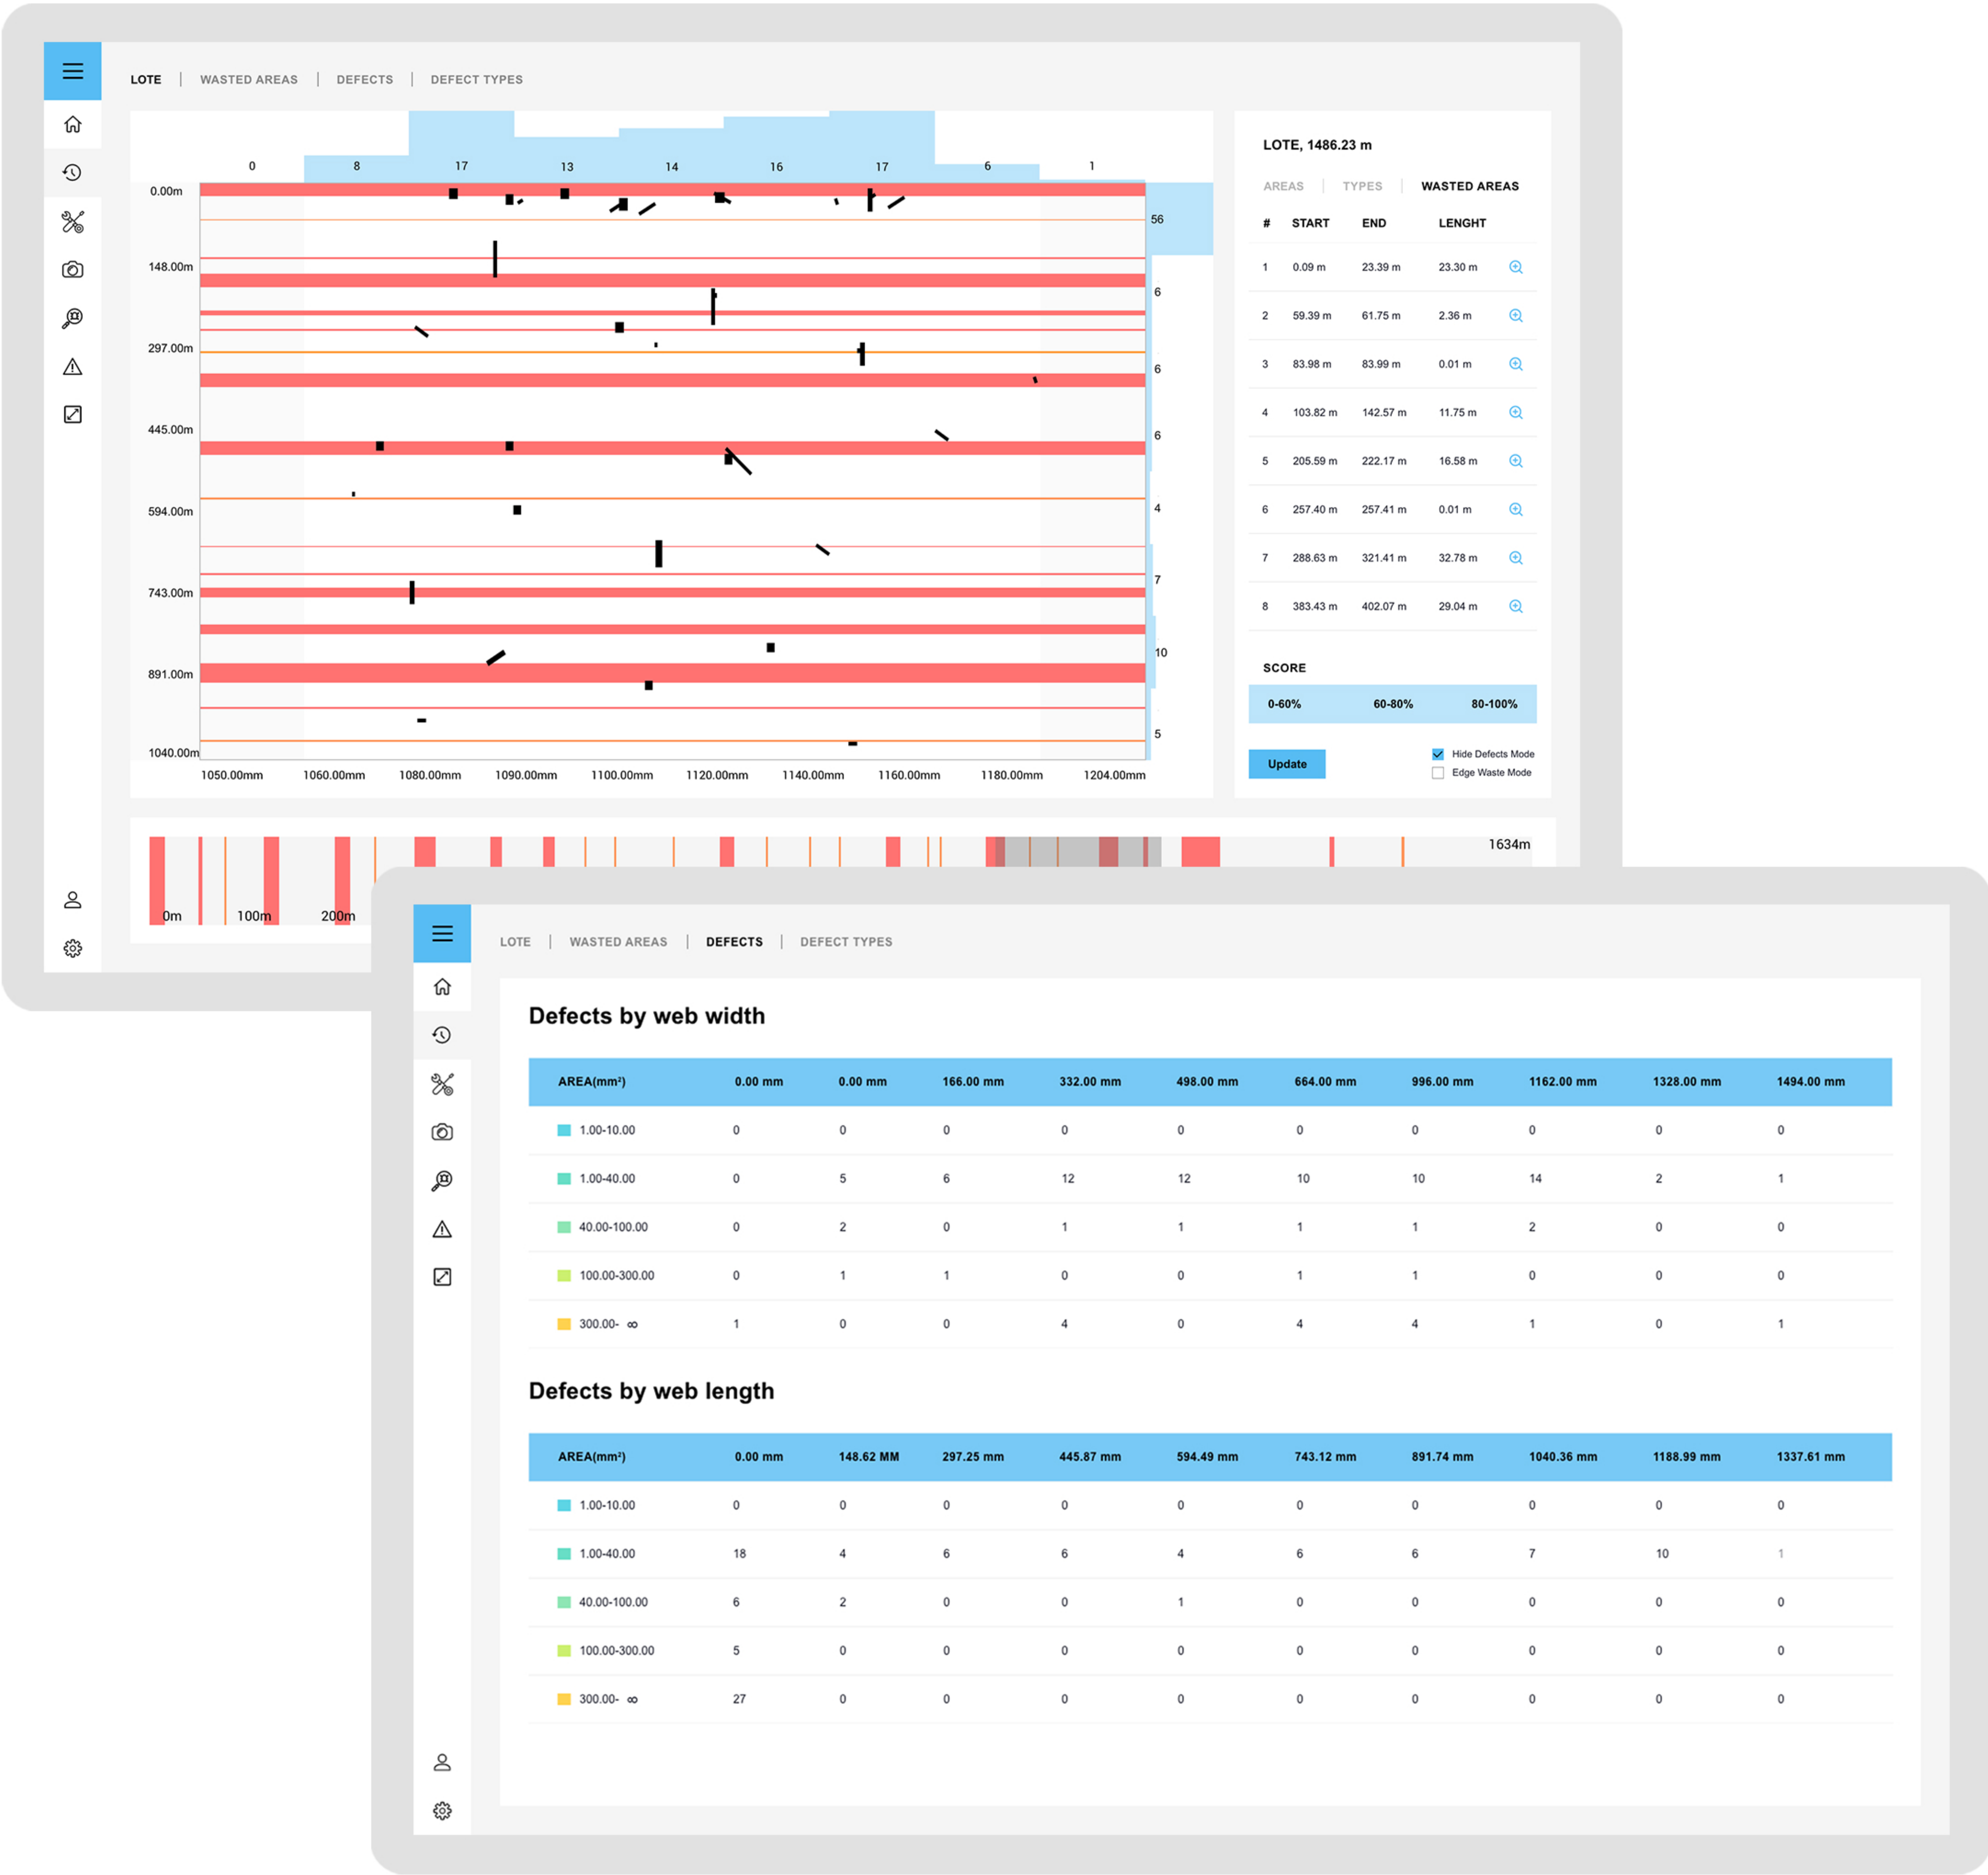

Img.1 - Production Real Time

With real-time information, it is possible to make more accurate decisions to improve product quality and reduce waste.

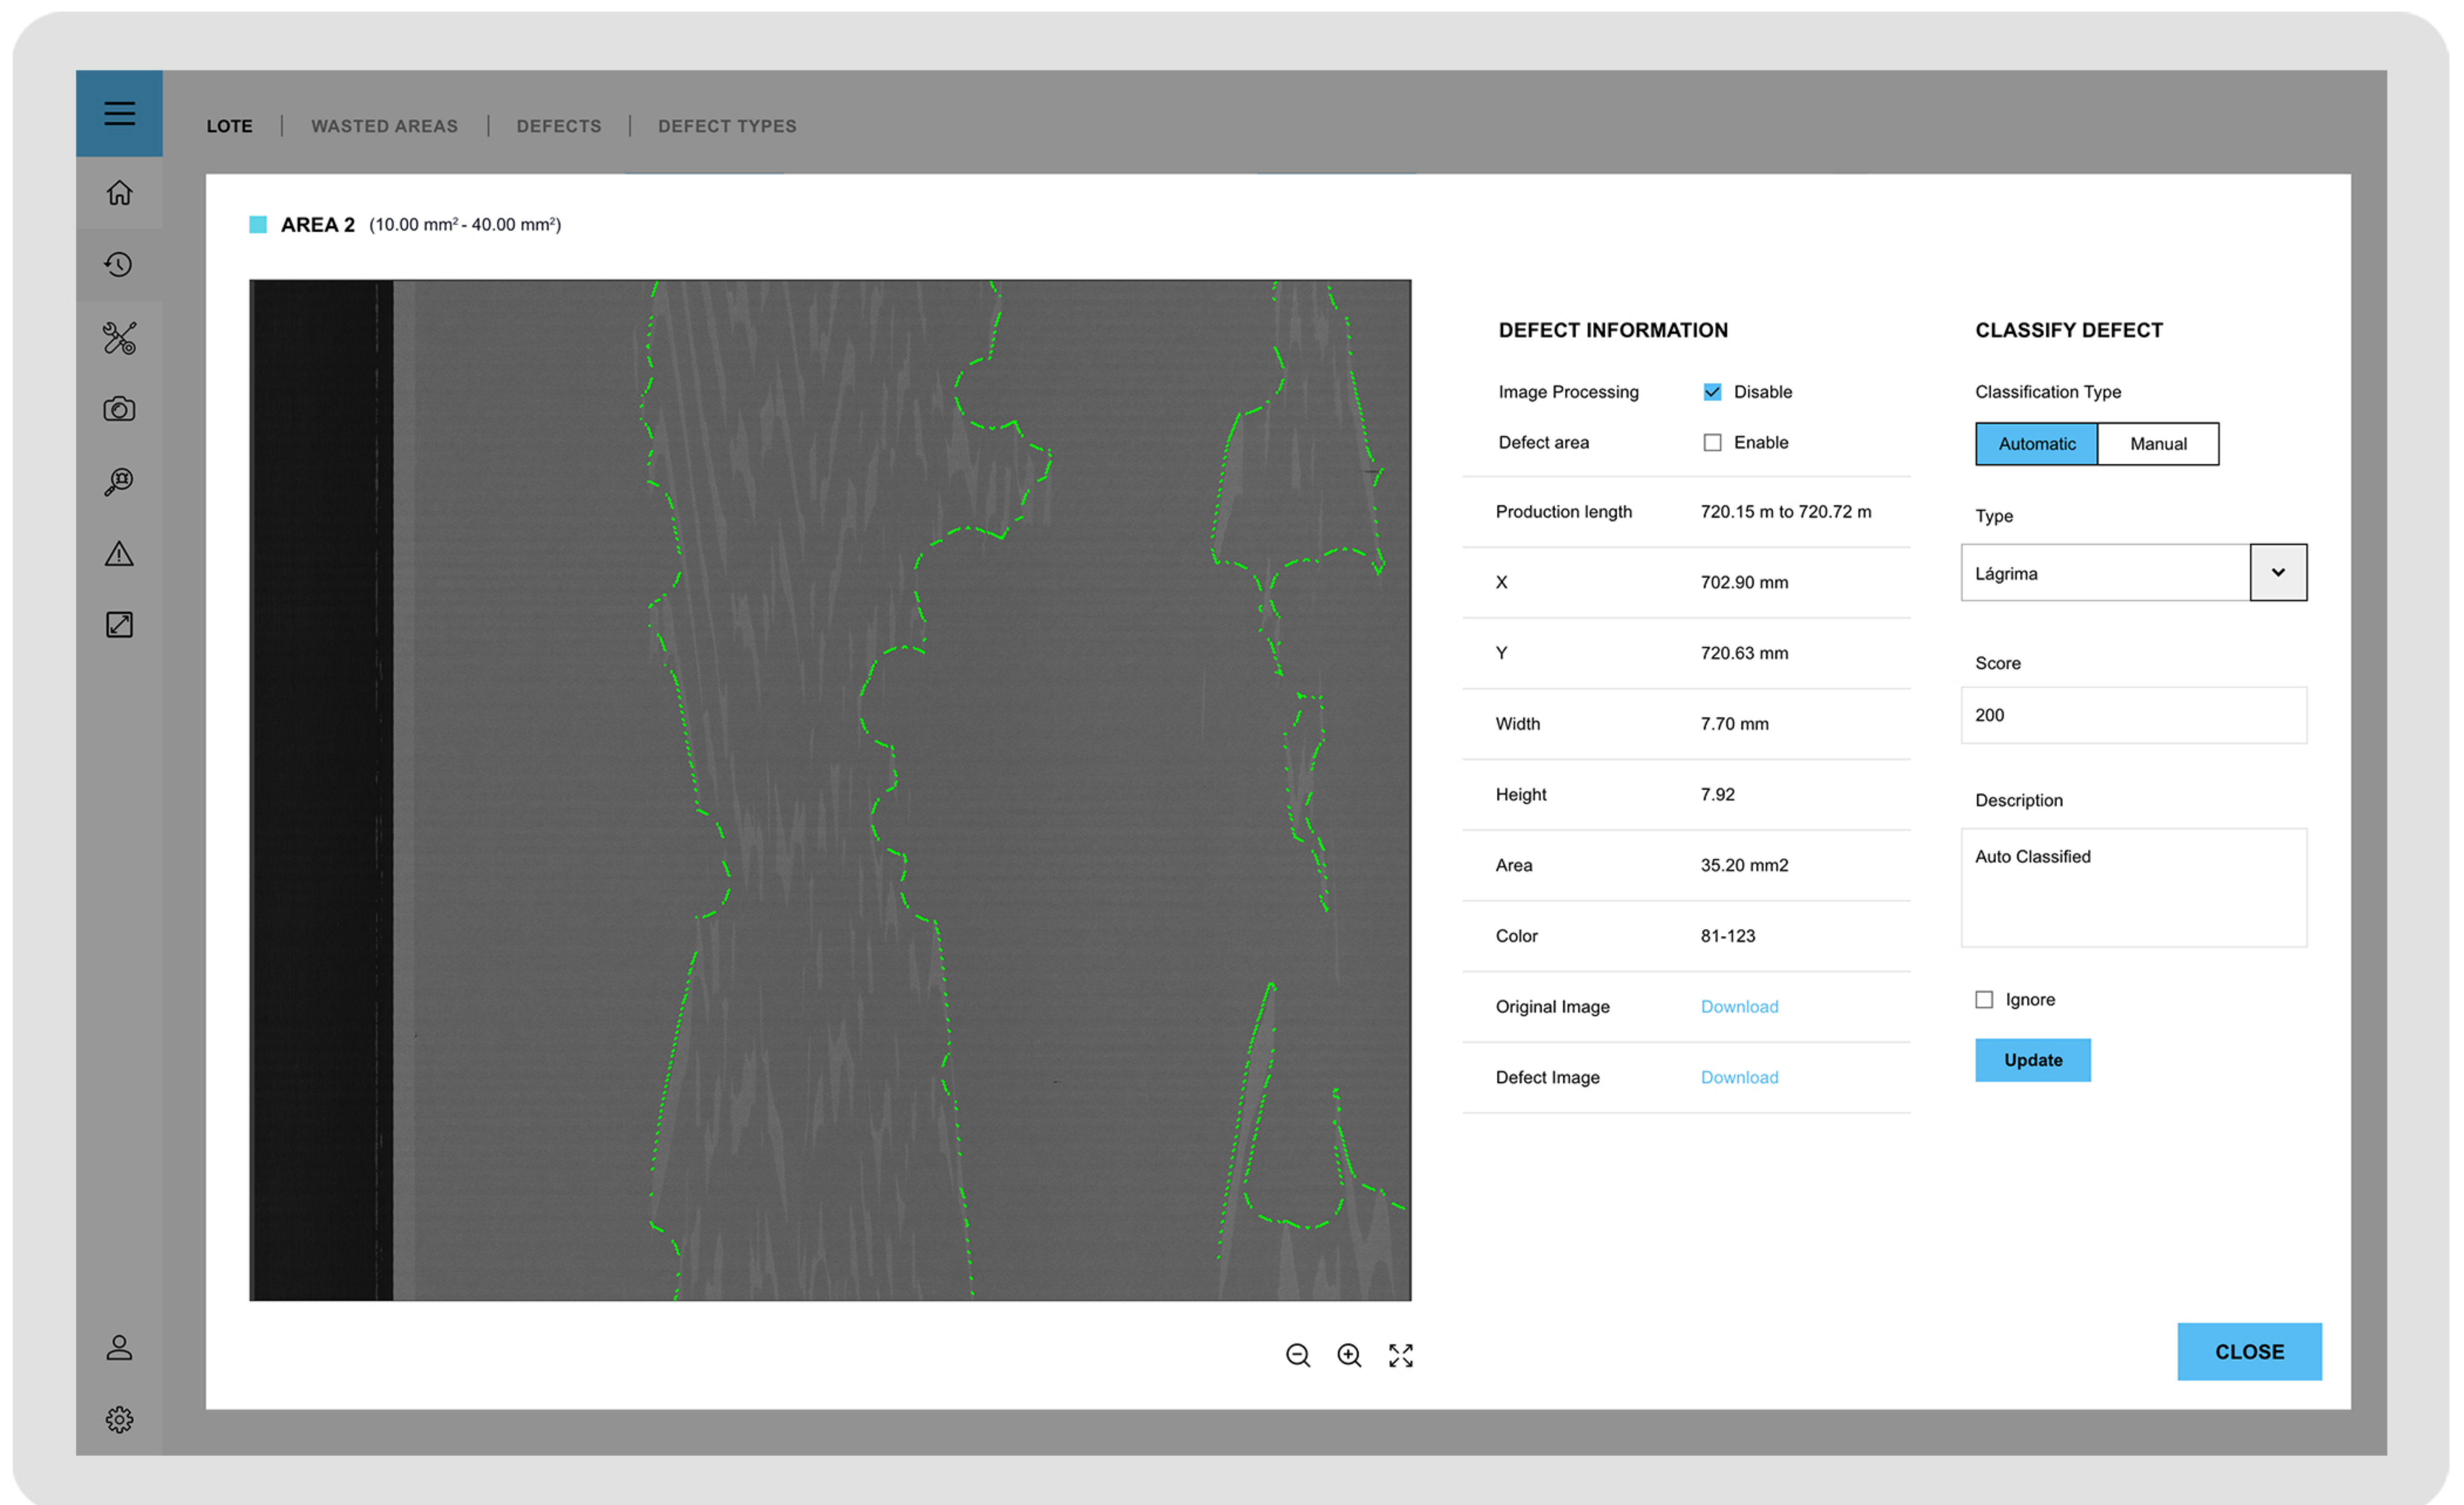

Product Traceability

The system stores the history of all production organized by batch and date with detailed information on each defect.

Img.3 - Defects

Img.4 - Production defect detail

Integration Features

The solution was designed with the current industry challenges in mind, the need for constant evolution and adaptation and integration with other systems.

- Label / Tag applicator.
- Automation of reports.
- Integration of ERP / MES and cloud information systems.
